

I CLAIM:

Sub 677 1) A bicycle trailer for attachment to the frame of a bicycle comprising:

a trailer frame having two rectangular members, each rectangular member having opposite end portions which are centrally and pivotally attached to the opposite end portions of the other rectangular member; and each rectangular member having a lower side portion extending generally horizontally along one lower side portion of the trailer and an upper side portion extending generally horizontally along an upper side portion of the trailer;

spacing maintenance means extending between the two rectangular members;

a tongue member having a rear end portion attached to a front end portion of the trailer frame; a central portion extending forwardly, and a front portion;

a releasable hitch having a bicycle frame mounted portion which is carried by the bicycle frame, and a releasable portion which is attached to the front portion of the tongue member;

a trailer bottom portion extending between the lower side portions of the rectangular frame members; and,

wheels each rotatingly mounted to an opposite central portion of the lower side portion of the trailer frame.
